

Advanced Technology in a Cell Phone App for COVERT VIDEO & AUDIO SURVEILLANCE.

Easy
Affordable
Practical
Safe
Covert
Reliable
Accurate
Secure

New undetectable surveillance app operates discreetly on your cell phone recording investigations while still functioning as a phone. Safely tracks GPS coordinates and live-streams activity reducing your risk by increasing response times. Multiple listeners can monitor operations in real-time and are alerted to situations instantaneously. With its infinite-distance range and higher-resolution transmissions, trust knowing your crucial evidence is accurately captured and safely secured.

Easy to use app on your own device, Android or iPhone

- Use your phone as a surveillance device
- No extra equipment to purchase making it an affordable solution
- Data files stored conveniently on your phone
- Secures evidence on an encrypted law enforcement exclusive cloud-based server

The tools you need for your investigations

- GPS Tracking pinpoints your location
- Undetectable software operates while having full function of your phone
- Dedicated app discreetly records with no beeps, sounds or flashing lights
- Records in real-time and live-streams operations

Advanced features you should expect

- Multiple listeners can monitor your investigations
- Unlimited recording minutes for ongoing investigations
- No transmission delay by using cellular data networks
- Precision-quality audio and higher-res video accurately records all activity
- Infinite-range distance recording capabilities
